Subject: ClarkDietrich's REDHEADER PRO Rough Opening Systems

Dear Valued Customer,

We recently received notification from IAPMO of a premature application of the IAPMO UES label on RedHeader PRO Rough Opening System. This occurrence happened in our McDonough, Georgia facility. The application of the label occurred after submission and approval of all required technical data but prior to the initial qualifying inspection of the facility. The RedHeader PRO products that were shipped into the marketplace are fully compliant with the requirements of the International Building Code and meet all AISI standards, referenced within. IAPMO has since updated our ER-723 report to include McDonough, Georgia. All future RedHeader PRO orders will receive the label below per IAPMO identification requirements

IAPMO UES ER-723

or the following ink string marking on each member where applicable:

CD SFIA XXXPROXXX-XX CPXX XXKSI IAPMO ER-723 (Coil Number) (length in inches)

Again, ClarkDietrich supports the performance and quality of the entire REDHEADER PRO Rough Opening System, manufactured at any of our facilities.

Any questions or concern please contact support@clarkdietrich.com
